## CONTENTS

FIRST, let me make myself clear! Don't expect to hack facebook account free as that just isn't going to happen. You either need some sort of a spying software to hack facebook account or actually have the phone or computer of the »victim«, to get their login credentials to facebook and even then if they have two auth enabled, you are basically screwed as hacking facebook password and the account with authenticator is hard except if you got their phone obviously. But don't panic just yet because we know that people DO NOT LIKE LINKING their phone number to their facebook account.

Why you might ask? One thing is security because in April 2021 facebook had 533 million users phone numbers and personal data leaked online. And did you know, that only the ones that had the phone number linked to the account, had their data leaked in this facebook hack?

Now this is perfect for us since we can easily hack facebook account with password and gain access. Now I won't be asking you why you need to hack facebook password of someone as there are millions of reasons, why one would want to hack facebook account and usually the case is a cheating boyfriend or girlfriend. Some people though need to collect some sort of proof that they need to show in case of stalking, cyber bullying etc. Whatever might your case be, you must probably be going mad since you can't find a working facebook hack and I know your pain.

Can you Hack Facebook Password and Account for Free?

Quick answer would be NO! BEWARE of all of those »hack facebook password for free« or »facebook account hack for free« since they are fake and won't get you nowhere. As mentioned at the beginning, you can't hack a facebook account and their password for free. The »call a hacker scam« posts all over the internet are there for a reason. It can be done for a certain price however, either by paying a hacker to brute force their way into the account or USE THIS FACEBOOK ACCOUNT HACK.

Ways to Hack Facebook Password Account There are two most known ways to hack facebook password of a specific account and gain access to it. One would be called »bruteforce« and the other would be a »spying software« that records all the keystrokes, saved password etc. The more reliable facebook hacking process would be the spying software.

Bruteforce Facebook Password Hack Bruteforcing can take really long time and there is no guarantee, that you will even hack facebook password with this process. What bruteforcing is simply trying millions of preset passwords that hackers usually have or find online and hope, that some of those match the account being bruteforced or in this case hacked. While it isn't that reliable, its actually the only reliable free way to hack a facebook account. YES you heard me right, bruteforcing will allow you to hack facebook password and account for free, if it will be successful on the other hand, that is another question.

Hack Facebook Password and Messages with Spying Software A spying software will not only let you hack facebook password and the account, it will also let you record messages, gain access to other social media profiles including dating sites, find out their current location and much much more. Because of so many useful features that can help you hack facebook account, it simply cannot be given out for free as developers put time and effort into this kind of facebook hacking softwares. Not to mention that they are constant updates so it makes them undetectable even if software updates come out on mobile phones or computers.

How to Facebook Password Hack any Account?

If you want to facebook password hack an account, the free way as mentioned before would be bruteforcing. But ask yourself, do you have time to leave computer on 24/7 and wait a week or two to maybe get the password? If not, then the best way would be by using facebook password hack spy software. It will record every message and other things silently meaning the victim won't know that you even accessed their account. You won't have to worry about them getting a notification on their email, that someone else accessed their account.
